PROFILE

Passionate & competitive game design graduate, thrives in a creative environment, thousands of hours put into creating passion projects which enabled me to work with giant brands & some of the industries largest influencers.

Tech Enthusiast & football fan who believes collaboration, new ideas & alternate perspectives shape the best finished products.

WORK EXPERIENCE

Checkpoint Studios OCT 2024 - FEB 2025

Content Producer

- Organised level design teams and artists to concept and commission assets that fit to our TV quality production standards and story telling needs.
- Work with developers to concept custom mechanics and features for the video that best serve the story, would then personally Q/A the features.
- Aided in script re-writes when I believed a part of the story would strain other parts of the production pipeline.

Capollo Media (Block Wars) DEC 2021 - FEB 2025

Game Design Lead

- Led a team of 5 people to concept, design and test new games, mechanics, maps and features on a monthly cycle.
- Created 10+ unique games and worked with game testers and public feedback to iterate and improve on games periodically
- Collaborated with brands to place advertisements and promotional material both as in-game features and billboards.

TBNR Productions OCT 2023 - DEC 2025

Content Producer

- Worked between the creative and production teams, guiding the creatives teams to craft narratives in a way which ensured the best efficiency and end-product for their millions of subscribers.
- Worked in positions out of my job scope while the team was stretched in a demanding environment, for instance utilising my level design experience to help that department when behind.

EDUCATION

Game Design Diploma: D D M SEP 2021- JUN 2023

Farnborough College of Technology
